All data acreage is approximate. GIS data used in this analysis is not survey accurate. Coastline, State Land Use and District Boundary GIS data were rectified to the current Parcel Data. Parcel Data is current as of July 2009. District boundaries do not necessarily follow along Parcel Data boundaries at the North Kohala/Hāmākua boundary, North/South Hilo boundary and North/South Kona boundary.

1/ Lands in urban use with sufficient reserve areas to accommodate foreseeable growth.

2/ Lands composed primarily of small farms mixed with very low density residential lots with minimum lot size of one-half acre.

3/ Includes land with a high capacity for intensive cultivation.

4/ Comprised primarily of lands in the existing forest and water reserve zones.
