

## HAWAII COUNTY SOLID WASTE ADVISORY COMMITTEE

### County of Hawai'i Solid Waste Advisory Committee Public Meeting Announcement

The Solid Waste Advisory Committee invites the public to express their ideas and preferences relating to the update to the County's Integrated Solid Waste Management Plan. This plan covers all aspects of waste management on the island, including waste reduction, education, recycling, composting, collection, transfer, and disposal.

These meetings are the first in a series to be held island-wide to get public input on the plan. At these meetings, CH2M Hill, the professional engineering firm serving as consultants to the committee, will present information and request feedback on the following topics:

- Advantages and disadvantages of our existing system
- The topics that will be included in the Plan update
- Key challenges facing the County
- What you like about the current system and what you want improved.

Come join us in shaping the future of solid waste management on the island.

The meetings will be held at:
